

Babies Statistical Enquiry - One-Page Timed Worksheet

AS91946 (1.1) PPDAC quick version

Student worksheet

2026-08-09

Name: _____

Class: _____

Date: _____

Investigative Question

What is the relationship between birth weight and age of the mother?

PPDAC Snapshot (timed)

P - Problem

1. Identify explanatory and response variables.
2. State your hypothesis.

P - Plan

3. Name the main graph and two key statistics you will use.

D - Data

4. State one data limitation and one reason we cannot claim causation.

A - Analysis

5. Attach or sketch scatterplot; describe direction, form, strength, and unusual features.
6. Record evidence: $r =$ _____, slope = _____, $R^2 =$ _____.
7. Explain slope and R^2 in context.
8. Briefly comment on diagnostics/influential points.

C - Conclusion

9. Write a final conclusion using evidence, context, and limitations.

Quick Self-Check

- ☐ I answered the exact relationship question.
- ☐ I used both graph and numerical evidence.
- ☐ I interpreted in context (not just copied outputs).
- ☐ I included at least one limitation and no causal overclaim.
